The use of l', n' and t' in Russian and Bulgarian (where they are not transliterations of a single letter, but merely l, n or t followed by the soft sign) is included to emphasise the fact that they are used for single letters only in Serbian.

'Shch' and 'sht' invariably represent the letter Щ in Russian and Bulgarian, respectively, since the pairs of letters (Щч in Russian and ШТ in Bulgarian) seem never to occur consecutively in the respective languages.

The above table is reproduced, by permission, from the pamphlet 'The transliteration of Russian, Serbian and Bulgarian for bibliographical purposes' published by the Royal Society, Burlington House, London W1 (February 1953, price 1s.). It represents the system at present in use in Science Abstracts for the transliteration of the names of journals and the names of authors of articles abstracted.

LIST OF JOURNALS

The periodicals and serials listed below are all scanned for material of value for reviewing in the Science Abstracts Publications (comprising Physics Abstracts, Electrical & Electronics Abstracts, Computer & Control Abstracts, Current Papers in Physics, Current Papers in Electrical & Electronics Engineering and Current Papers on Computers & Control). The list includes those periodicals from which all articles in each issue are invariably abstracted, but they are also listed separately at the end ('Journals abstracted completely').

Some of the abstracts are reproduced, with permission, from other abstracting periodicals, and in these cases the name of the

abstracting organisation may be given in place of the address of the original journal, where it has not been possible to determine the latter. Further inquiry should be made from the abstracting organisation named, addresses are given at the end of the list ('Abstracting journals and reports').

Abstracts are published only of articles which are believed to be in general circulation, and which should therefore be available in national and scientific libraries, or from the publishers, whose addresses are given in this list. Application should not be made to 'Science Abstracts' for copies of the full text of any of the articles abstracted, or for translations.

AUTHOR INDEX – PART II

The main entry in the index appears under the name of the first author given in the original article and is followed by the names of co-authors, title of article, and the year and serial number of the entry in the abstracts journal, e.g.

Brown, J., Smith, T. Education of scientists and engineers 1-1234

Entries for co-authors refer to the main entry, e.g.

Smith, T. see Brown, J. 1-1234

The abstract entry number consists of the last digit of the year of Science Abstracts and the serial number of the entry in that year. Thus 1-1234 means item number 1234 in the 1971 volume of this section of Science Abstracts.

The alphabetical arrangement of author names is word-by-word, i.e. Van der Merwe is listed before Vanderhagen.
